Building a Healthier Canada: Strengthening the Workforce and Canadian Health Care Institutions

Since its establishment in April 2020, the RSC Task Force on COVID-19 has commissioned a series of studies related to health and health care in Canada, including Policy Briefings on Long-Term Care, Homelessness, Epidemiology, and Excess Deaths due to COVID-19.

In the fall of 2021, the RSC will publish a series of Policy Briefings that will animate discussion on how to build a healthier Canada coming out of COVID-19, including [Post-COVID Healthcare in Canada](#), [Post-COVID Critical Care](#), and [The Future of the Nursing Workforce](#).

With audience engagement throughout the symposium, the event will close with an exchange of views about next steps in each of these areas guided by the aspiration of emerging from the pandemic as a better society than we were going into it.

TUESDAY, NOVEMBER 16, 2021
