The Legacy of Insulin Discovery: Origins, Access, and Translation **Thursday, November 26, 2020**

This virtual symposium will have an introductory section that all attendees will be invited to view. This will provide overview of the history of insulin discovery. Attendees will then be encouraged to select from one of three shorter streams that explore different thematic aspects of insulin discovery and its legacy:

STREAM 1 - Patient Perspectives

STREAM 2 – Public Health Challenges: Building on the Resilience of Communities to Achieve Health Equity

STREAM 3 - Commercialization and future scientific research into insulin and diabetes prevention
